YOUR PRODUCTION LINE IS ON YOUR SCREEN

Eagleye RSD ensures that the changes you make while the system is running are active immediately after saving. You can follow your entire production live with the animations you will design, and make additions or changes while the whole system is running.

FLEXIBLE WORKING OPPORTUNITY

Eagleye RSD, with its flexible structure, is designed for special solutions to your needs such as GCode, Tube bending and 3D simulation. Recipes, reports, functions and tools that will facilitate your applications can be integrated into the software.

FAST ACCESS AND UNINTERRUPTED RECORD

Eagleye RSD is designed for fast access and uninterrupted recording. Communication, recording and trend functions work independently from the system, ensuring optimum use of overall operating performance. Users can create their own data tables and operate on these tables.

REMOTE ACCESS

You can access to your registered and current data through;

- RSD Client
- RSD Web
- RSD Mobile

SMS & E-mail ALERT AND TRACKING SYSTEM

By preparing scripts based on time and event, you can inform users in cases such as limit, target, alarm.
